[a] The collector of customs at San Francisco, under date of February 26, 1886, forwards a statement of his appraiser that the polariscopic test of the Hawaiian sugar brought into that port during the fiscal years 1884 and 1885 would average a little above 93°. The estimated duty remitted has, therefore, since 1883, been computed, on sugar not above No. 13, at 2.12 cents per pound, which is the equivalent of the polariscopic test above indicated.

[b] Duty remitted calculated only to April 1, 1891, when sugar imported from all countries was made free.
